

KENO-L108 Non Dry Glue Labeling Machinery

This machine is used for processing upright paste, continuously supplying bottles and feeding labels. The speed of label sending out and the speed of wrapping bottle are precise. The label pastes smooth. Partial paste and whole paste are chosen at will. If the label machine attaches printer, it can finish label printing at the same time. The machine is adaptable to different bottles, widely used in the trades of foodstuffs, pharmaceuticals and daily chemicals, and chemical industry for labeling plastic bottles in various specifications. It is an ideal machine in place of manual labeling and suitable for mass production.

Technical Parameters

- 1) Object to apply: Standing and steady round column object
- 2) Labels: Adhesive labels (dry glue labels)
- 3) Dimensions (L x W x H): 2000 x 1200 x 1300mm
- 4) Label length: 15 - 380mm
- 5) Label height: 15 - 130mm
- 6) Object diameter: 25 - 120mm
- 7) Object height: 20 - 300mm
- 8) Power supply: 220V, 50/60Hz, 0.24kW
- 9) Weight: 140kg
- 10) Label speed; 0-200p/min
