

SL-5218 Single Side Labeling Machine

Features

1. Side labeling machine suitable for square and flat objects.
2. It can be equipped with an independent shaping mechanism, which is specially used for automatic labeling of irregularly shaped objects in the cosmetics industry; it can be equipped with a roller sticking device to realize automatic labeling of round bottles at the same time.
3. The top pressure belt is mechanically connected with the main conveyor belt to ensure the reliable verticality of the attached object and the conveyor line.

Technical Parameter

- Labeling speed: 80-200 pieces/min
- Labeling accuracy: ± 1 mm
- Maximum label width: 200mm
- The size of the affixed object: height ≤ 400 mm, width ≤ 100 mm
- Applicable paper roll inner diameter: $\varnothing 76$ mm
- Applicable paper roll outer diameter: maximum $\varnothing 350$ mm
- Machine size: 3048x1200x1650(mm)
- Power consumption: 220V 50Hz 1500W
