

Induction Sealing Machine HL-3000B

HL-3000B is applicable to seal plastic container or glass container made of any kind of material.

- Full stainless steel enclosure, digital display, artistic design; split structure, easy to use
- Water cooling circulation system, keeping the power of components at a desirable temperature range for more reliable operation.
- It has a simple structure so it can be very convenient to be maintained and repaired.
- Under/over-voltage protection, over-current protection, overheat protection, etc.
- The stadium-style magnetic heating ring causes high efficiency, high speed, stable and reliable performance.

Application:

It is widely used in sealing non-metallic container with aluminum foil, such as, medicine, food, cosmetics, oil, pesticides, and chemicals and so on.

Parameters:

Model	HL-3000B
Voltage(V/hz)	AC 220V/50 220/60
Power(w)	3000
Seal diameter (mm)	Φ15-60 or Φ50-121
Sealing speed(Bottles/m)	0-300
Size for main body(mm)	1800×400×1330
Gross weight(Kg)	147
Cooling mode	Water-Cooling
Appearance	Stainless steel
Packing size(mm)	1945×545×1575
