

CYJ-150 Capsule Polisher

This machine is suitable for polishing and cleaning the powder on the surface of various capsules, which solves the previous manual polishing condition. It meets the hygienic standards and is an ideal polishing equipment for capsule manufacturer.

Working Principle:

The capsules, pills or tablets fed into hopper are actuated to enter into cylinder by the rotating polishing shaft brush. Under the action of the polishing shaft brush, they are rotated helically along with guide spring, then the dust inside the cylinder are removed by dust collector so that accomplish polishing.

Technical Parameters

Production efficiency	3000- 7000 capsules/min
Application range	Various capsules
Power	220V 50/60Hz
Weight	50kg
Dimension(L*W*H)	1300*500*1100mm
Accessory equipment	dust collector(1pc)
