

ZHT-A Fully Automatic Screw Thread Cap Capping Machine

This machine is suitable for various material and different shape containers. Such as plastic bottles, glass bottles, and metal bottles

Major Characteristics

This machine applies and torques caps onto containers. It's suitable for various material and figure Containers. Such as plastic bottles, glass bottles, and metal bottles. If we want to change different material or figure bottles and caps for tightening, we don't need instead any components, we just adjust the position of several components. No caps will be dispatched if there is no bottle in the seat. Sorter Selections machine, conveyor machine, cap tightening machine, bottle calming strap can be conversion adjusted to meet the tightening requirements for various bottles And caps .the machine is made of good type stainless steel, also applied to GMP standard requirement. (Custom-tailoring diversified for special specification)

Main Performance parameter

Current supply	AC 220 V;50HZ (or according to client voltage requirement)
Power	2.2Kw
Production speed	0--- 6000 bottle/hour
Container mouth size Range	Diameter: $\Phi 40\text{mm}$ - $\Phi 100\text{mm}$
Suitable Cap size range	Diameter: $\Phi 20\text{mm}$ - $\Phi 50\text{mm}$
Machine Weight	650kg
Machine Dimension(L×W×H)	2000mm × 850mm × 2050mm
