

Troche Packaging Machinery SD-38P

This troche packaging machinery is typically used for packing tablets, buccal tablets, pills and more, and it is widely used in industries of medicine, food, chemical and the like.

It's appropriate packing materials include a wide selection of heat-sealable composite packing materials, such as paper/polyethylene, cellophane/polyethylene, polyester/aluminum/ polyethylene, polyester/polyethylene, BOPP films, tea filter paper, and so on.

Features of Troche Packaging Machinery:

1. This troche packaging machinery can meet various GMP standards.
2. This kind of packing machine is capable of automatic bag making, metering, filling, sealing, cutting, counting, and batch number printing.
3. It is equipped with photoelectric tracking system and computer control system. And the computer control system guarantees its accurate tracking, automatic output alarming, and high-speed packing.
4. High-speed code printer is also available, and it can automatically print the batch number and shelf life for products.

Technical Parameters of Troche Packaging Machinery:

SD-38P	
Sealing mode	3-side sealing, 4-side sealing, or back-sealing
Packaging speed	30-80 bags/min
Bag size	Length: 55-110 mm; width: 30-80 mm
Metering range	Less than 80
Power supply	220V 50HZ 1.5KW
Total weight	350kg
Overall dimensions (length×width×height)	600×790×1800 mm
