

## HFB-35 Automatic Strapping Machine

HFB-35 automatic packing machine is a new product developed by our company by absorbing foreign technology and combining with foreign technology. It fills the gap of packing after packing in pharmaceutical enterprises, and can be linked to unpacking and packing, realizing a complete packing production line. The body and components of the equipment are all aluminum high-end advanced design, imported imported electrical components, PLC, man-machine interface operation, make the equipment operation process more stable and convenient, can be used in the pharmaceutical, food, cosmetics industries, the equipment complies with CGMP standards.

### Technical parameters:

Type	HFB-35
Bale size (LxWxH)	The maximum is 250*250*300(MM)
	The minimum is 50*60*90(MM) (this size is the package size)
Use packaging	PE film    Applicable cable tie specifications (width): 30~80mm
	Binding film thickness: 30~80um
Strapping speed	The strapping speed is 25~35 pieces per minute
Working power	220V/50Hz
Equipment power	3000W
Working pressure	The working air pressure is not less than 0.6 MPa, and the exhaust volume: 0.3 cubic meters per minute
Dimensions	2800x1000x1750mm (plus conveyor belt size)
Total weight of equipment	890kg
