XY-XB02 Weighing Machine/ Weigher

Technical features:

- Using weighing module + touch screen control, real-time display of action status and weighing information
- Using Mettler Toledo sensor to achieve high-speed and stable detection
- Automatic dynamic zero-point tracking technology, higher precision
- 100 kinds of formulas can be preset, fast product switching
- Dynamic weight inspection, no need to stop the product, higher efficiency
- Unqualified weight is automatically rejected, saving time and effort
- Adopting machine-added roller transmission, reducing belt vibration

Equipment parameters:

Model	XY-XB02
Power supply	220V 50HZ 400W
Air supply	≥6Kg/cm² 0.05m³/min
Detection range	50g～50Kg
Speed	5～30 Metre / minute
Standard accuracy	10g
Weighing method	Load Cells
The alarm way	Buzzer , Warning light
Weighing size	800mm
Rejection method	Roller conveyor + push rod rejection
Table height	600mm
Mechanical Dimensions	L1600xW830xH1450mm
Mechanical weight	260Kg
