

ZH-260 Automatic High Speed Cartoning Machine

This machine is a fully automatic continuous high-speed boxing machine, which integrates machine, light, electricity, and gas into a high-performance product. It is suitable for automatic boxing of aluminum-plastic blister panels, bottles, hoses, soft double aluminum, and bag shaped items, and can be matched with it to form a packaging production line.

Features:

- Simple structure, large maintenance space, few fault points, easy to troubleshoot, few components, low maintenance and operating costs.
- The unique synchronous wheel synchronous belt connection output method is stable and reliable, without mechanical wear, does not require lubrication, extends the service life of components, and effectively reduces labor intensity.
- Instant card box separation and shutdown mechanism, one card stops immediately without damaging the paper box, and can be opened immediately after removal, which is convenient and fast, reduces packaging waste, improves work efficiency, and reduces labor intensity.

Parameters

Productive capacity	100-220 cartons/min
Carton size range	Max. 160x130x50mm, Min. 75x50x20mm
Leaflet range	80-150mmx90-200mm(LXW)
Power supply	Min.folding width 15mm
Main motor power	380V 50Hz 2.2KW
Air consumption	0.06-0.09m ³ /min (Pressure 0.6-0.9Mpa)
Overall dimension	4750x1600x1800mm(L*W*H)
Machine weight	About 3500kg
Noise	80dB
