

DZQ-600 Vertical Vacuum Food Sealing Machine

The vertical vacuum packaging machine is a vacuum packaging machine primarily used for sealing composite film packaging materials. It can vacuum pack or inject gas into various items, including solids, liquids, and powders. After vacuum packaging, products are protected from oxidation and mildew, food stays fresh, and the product volume is effectively reduced. This machine is widely used in food, medicine, electronics, chemicals, and other fields, making it an ideal choice for factories, stores, and service industries.

Product Description

Advantage

- This is an upright vacuum machine, easy to move and operate while standing.
- The vacuum packing machine's sealing strips can be configured with either double sealing or single sealing.
- It features two 20m³ vacuum pumps, offering greater suction power and twice the efficiency of smaller models.
- The vacuum packing machine has a large chamber structure.

Technical Parameters

Model	DZQ-600
Voltage	110/220V 50-60Hz
Pump Power	1.8kw
Pump Capacity	20m ³ (x2) /h
Sealing Length	600mm (x2/3)
Sealing Width	10mm
Chamber Size	630x626x95mm
Dimension	740x710x975mm
Weight	≈145kgs
Certification	CE ISO
