

MC5000B Vertical Powder Packing Machine

Marchi Packaging Equipment is a 27-year-old manufacturer specializing in vertical packaging machines for powders and granules. It can package products such as Sichuan peppercorns, chili powder, sauces, monosodium glutamate (MSG), cumin powder, spices, seasonings, condiments, fried chicken powder, five-spice powder, chilli powder, marinade mix, hot pot base, boiled fish seasoning, barbecue seasoning, and more. For the vertical packaging machine you need, you can [click for details](#) to learn more.

Equipment Introduction:

This unit consists of a vertical screw metering machine and a 5000B vertical filling and packaging machine, making it particularly suitable for metering and packaging ultra-fine powder materials with high dust content. It integrates metering, bag-making, packaging, sealing, coding, and counting into one system. Equipped with an advanced material level control system, it can also be fitted with an anti-static device and dust collection system, effectively solving the challenge of fully automatic dust-free packaging.

Equipment Advantages: Good sealing with no dust, easy to clean, convenient to change packaging specifications, cost-effective, low failure rate with easy maintenance, compact footprint, and low packaging material cost.

Equipment Parameters:

- Equipment Model: MC5000B
- Bag Size Range L×W (mm): (50~340)×(80~250)
- Supported Bag Types: Pillow bags, gusseted bags, punched bags, carry bags, box bags, etc.
- Weighing Range (g): 100~2000
- Weighing Accuracy: ±0.5%~1%
- Packaging Speed (bags/min): 10~50
