

BZJ5038B Automatic Bottle Shrink Wrapping Machine

The automatic bottle shrink wrapping machine is up and down power proximity switch control, effectively prevent the mistake cutting., at the same time to ensure the safety of operation person.

High-performance, omron PLC for the whole machine is stable, reliable operation, and has played a key role.

Product Introduction

1. The automatic bottle shrink wrapping machine is up and down power proximity switch control, effectively prevent the mistake cutting., at the same time to ensure the safety of operation person.
2. High-performance, omron PLC for the whole machine is stable, reliable operation, and has played a key role.
3. Omron ac contactor and high-power solid-state adjustment perfect combination, with intelligent instruments, make the system more accurate temperature, greatly extend the service life.
4. High-power infinitely variable speed system to ensure the quality of delivery;
5. Hot air circulation system from top to bottom, to ensure that the one-time get perfect packaging effect.
6. Automatic bottle shrink wrapping machine adopts PID temperature controller, precision and energy saving.
7. Automation control system, the production process is stable and reliable, able to adapt to work long hours non-stop.
8. PLC programmable control system, ensure the accuracy and stability of the packaging process control.

Technical Parameters

Model	BZJ5038B film cutter
Power supply	220-240V, 50-60HZ
Power	1.6kw
Max packing size	450*270*330mm
Speed	0-8times/min
Loading	25kg
Film width/thickness	Max 650mm/ 0.03-0.25mm
Machine weight	210kg
Machine size	1020*830*1980mm

Model	BSE-5040A shrink tunnel
Power supply	220, 380~460V ,50-60hz
Power	20KW
Convey speed	0-10m/minute
Shrink tunnel	1800*500*400MM
Loading	30KG
Size	2800*820*1680MM
Suitable material	PE,POF,PVC,PP
