

SH-FM5A Automatic Bottle Albumen Acrylic Milk Powder Auger Filling Machine With Feeding Machine

This auger filling machine is designed for filling powder or small granules like talcum powder and bath salt, this kind of powder filling machine can fill material according to controlling predetermined number of revolutions, it improves working accurately. It also equipped with the material feeding machine, this can feed powder automatically, saves working labor. (This machine is optional, we can remove this machine if you already have feeding machine).

Main Feature

- ▶ Equipped with customized material feeder, which helps you save production labor and time.
- ▶ It is with mixer which can mix up material well before filling.
- ▶ The filling nozzle can customized according to filling material.

Parameter

- Machine supply: 380V 50Hz/60Hz
- Powder: 2.2KW(Machine)+1.1KW(Feeder)
- Production capacity: 15-30 cans/min
- Filling volume: 5-50g/50-300g/300-1000g/1000-5000g(Change auger)
- Hopper size of feeding machine: 150L
- Feeder pipe diameter: 102mm
- Feeder ground height: 1650mm
- Number of filling heads: 1 head (multiple heads are optional)
- Measurement error: $\pm 1\%$
- Dimensions: About 2000*1000*1980mm
- Weight: About 200kg
