

SED-400J-H Pharmaceutical Capsule Filling Machine 400 Holes For Powder And Pellets

SED-400J-H Automatic Capsule Filling Machine is commonly used in the pharmaceutical, nutraceutical industries to fill empty hard gelatin capsule of various sizes with powders and pellets (optional). The capsule filler automatically orientates, opens the empty hard gelatin capsule, properly fills the capsule with powder, and automatically closes the capsules.

Characteristic of Capsule Filling Machine

- 1) This machine runs as per automotive separating revert interval, feeding, removing useless capsule, clipping and coming capsule, cleaning mould are completed at same time, which has reach high precision and low noise levels
- 2) With the automatic controlled, the speed can be adjusted by frequency conversion. Digit display, the machine is easy to operate
- 3) This machine is with good suitability, high frequency for filling Chinese and western medicines. Which adopted more hole type working principle, exact calculating, the difference of packing are more advanced than its standard of governments pharmacopoeia
- 4) It is equipped with safety protection unit for people and machine. It can be automatically stopped when the material used up. It is good equipment for a pharmaceutical manufacturer

Main Parameter

Model	SED-400J-H
Capacity	400 capsules/min
Filling Material	Powder, Granules
Die Hole Number	3
Power Supply	380V 50Hz 3P
Total Power	3.75KW
Application	00#-4# capsule
Filling Variation	±3% - ±4%
Noise	≤78dB(A)
Qualified Rate	≥99.5%
Overall Dimension	800mm (L) x 970mm(W) x 1870mm(H)
Weight	600kg
