

PL-252

CORNER WRAP & TAMPER PROOF LABELING MACHINE

Specification

- Supply Voltage: 220/110 VAC 50/60 HZ 1 phase
- Power Consumption: 820 VA
- Dispensing Speed: 40 m/min max.
- Conveyor Speed: 40m/min max.
- Applicator Height: 80mm
- Label Size: 80mm x 300mm max.
- Spool Diameter: 76mm
- Dimension: 1700mm (L) x 950mm(W) x 1500mm(H)

PL-252

CORNER WRAP & TAMPER PROOF LABELING MACHINE

As part of Pack Leader's extraordinary portfolio of high-quality, versatile labeling machines, the PL-252 labeling system is able to accomplish the tamper evident and corner labeling efficiently. With its phenomenal speed and accuracy, PL-252 is the best choice for the pharmaceutical products, food, consumer goods, and cosmetic industries among others.

Distinctive Design

The PL-252's dual-head design applies tamper evident labels on the edge of cartons in an L-type seal. With both labeling heads working simultaneously, this machine enables you to apply labels to both ends of your product in a single pass.

Simple to Use

The built-in operating instructions and trouble-shooting guide offered on the operator interface, as well as hand wheels that provide for simple adjustments, enable quick set-up and easy changeover.

Made to Last

In strict compliance with Good Manufacturing Practices (GMP) standards, the PL-252 is made of 304 stainless steel and anodized aluminum, and carefully treated to guard against the effects of harsher environments. This durability trans into a solid choice to withstand three shift operations.

Flexible

- For diverse product sizes and shapes, the PL-252 product sensor can be adjusted for various applications. With the manual position setting, your labels are placed accurately on the product, each and every time.
- The hot-foil printer controls allow for future upgrades if the need for a hot-foil printer arises. This integrated feature allows the hot-foil printer to work in sync with the labeler to ensure accurate code placement. The result is simplified label customization, which can easily be turned off or on.
- Depending on your needs, this machine can be used either for in-line automatic or semi-automatic applications.

Productive

- The Production Preset function enables the machine to automatically stop once the pre-set quantity of products has been labeled.
- The Label Countdown feature allows you to see precisely how far along the project is as the production run progresses.
- The Container / Production Run Counter provides the total production number for the day.
- With the Touch-Screen Control System with Job Memory, you benefit from a battery-free microprocessor control system that can maintain default settings and memory even after the machine sits idle for a long period of time.

Practical

- The PL-252 can easily and conveniently be moved to other production areas to allow for changing in production or products.
- The durability inherent with the PL-252 is due to its being made from 304 stainless steel and anodized aluminum, specially treated to guard against rusting and other effects from the harsher environments.
- The machine's height adjustable conveyor affords you exceptional convenience and flexibility.

Compliant

The PL-252 is manufactured in compliance with Good Manufacturing Practices (GMP) standards, and according to strict ISO 9001 quality control procedures. Pack Leader's compliant labeling machine gives you a high comfort level as you undergo the required quarterly inspections from industry compliance auditors.
