

Automatic Multi-lane 4-side Sealing Powder Packaging Machine DXDF-900D

This machine is the granule/powder mix packaging machine with full servo motor controlled. We are the first who develop and release this machine in China. By employing computer-controlled filling, the quantification is more accurate, and it's more convenient to make adjustment for the machine. It has been serving in one of the world's top food producers with perfect feedback.

Features:

- Extremely efficient, high power, low noise, easy to maintain and has a long life span.
- Roller heat sealing, four side sealing, high speed and multi-line packing, and with bag coming smoothly and fine, high packing efficiency.
- Easy to adjust precise in measurement, requires a simple procedure for pouch length adjustment without changing the mould. Functions can be regulated for longitudinal sealing, transverse sealing, filling notch cutting, longitudinal cutting, fracture line and transverse cutting with the advanced technology for our man-machine interface.
- Accuracy in printing plate, automatic counting, and photoelectric tracking system is adopted to ensure the automatic correcting the double side printing design on packing bags, precise in counting.
- It has reliable performance, convenient to operate and super automatic. PLC is uses for automatic controlling and frequency changer is for step-less speed adjusting.

Parameter:

Model	DXDF-900D
Bag size	L:50-150 mm W:40-105 mm
Filling range	1-40 ml
Capacity of per-line	30-70 bags/min
Max width of film	900 mm
Power	380V 8.5KW
Weight	1500 KGS
Dimension (L*W*H)	1650x1400x2200 mm
