

Rotary Eight Head Capping Machine JT-XG/8

JT-XG rotary capping machine is new production, developed by our company years ago. It equips 8 sets cap flexible sealing heads, and clockwise rotated along with the big rotating disk. The machine has practicability in field of pharmaceutical, pesticide, chemical, foodstuff etc. It is real ideal equipment for bottle capping.

Technical parameter:

- Applied bottle range: 20~1000ml
- Applied cap size: $\phi 12$ - $\phi 100$ mm
- Yield of capping (sealing): $\geq 99\%$

Production capacity:

- Eight head: 9000-10000 bottles/hour
- Six head: 6000-8000 bottles/hour
- Power supply: 380V 50Hz/60Hz
- Power consumption: ≤ 1.2 Kw
- Speed control: frequency conversion adjusting speed
- Single machine noise : ≤ 70 dB
- Weight: approx. 800Kg
- Overall dimension: (L×W×H) 3000×1200×2000 (mm)
