

DF-A Powder Filling Machine & DS-3 Feeder System

This machine is an economical and practical powder automatic filling machine that can complete the automatic positioning, filling and metering of bottles. This semi-automatic filling and packaging machine was designed in terms of the National GMP Standard. It is easy to operate and has high stability. It can be combined with bottle unscramble, capping machine and labeling machine to form a complete filling line. It is suitable for quantitative packaging of powdery and powdery materials, such as flour, milk powder, pesticides, veterinary drugs, dyes, chemicals, foods, additives, enzyme preparations, etc.

Feature:

1. Filling system is driven by step motor high weighing precision.
2. Working conditions shows in English by touch screen display.
3. Auger is driven by fast response clutch/brake, and weighing feedback proportion tracked.
4. Chinese/English is displayed in touch screen.
5. Made of stainless steel totally, the door of hopper can be side opened.
6. Machine structure is simple, compact, easy to operation and maintenance.
7. Change the auger attachment, suitable for packing materials from powder to petty grain.

Parameters:

Model	DF-A
Voltage	220-240V
	50/60Hz
Power	1KW
Filling Weight	5-5000g
	(Change auger attachment)
Filling Accuracy	$\leq \pm 0.3\% - 1\%$
	(According to packing weight and product specs)
Filling Speed	20-30 bags/min
Hopper Volume	30L
Machine Size (L *W* H)	1950 *970 *650 mm
Weight	200Kg
Package	Export Wooden Case
