

## Spray Filling Capping Machine

The Spray Filling Capping Machine is applied for liquid filling, automatically caps loading and screwing of bottles with long and thin pipe caps in pharmaceutical, food and cosmetics. The machine can automatically finish the bottle filling, bottle capping. With no bottle no filling feature.

### Technical Parameters:

Capping Head	Single Head	Double Head
Production Capacity	30-50 bottles/min	40-90 bottles/min
Dimension	2400*1350*1650mm	2500*1450*1650mm
Weight	450KG	650KG
Filling Accuracy	$\leq \pm 1\%$	
Filling Pump	Piston Pump (Glass Pump, Peristaltic Pump)	
Plugging Cover Rate	$\geq 98\%$	
Capping Rate	$\geq 98\%$	
Voltage	220V/50Hz	
Power	2KW
