

Liquid Filling and Plugging Machine

This liquid filling and plugging machine can be used for filling and plugging a wide range of glass bottles. Peristaltic pump and plunger pump have been used for filling work, and it can effectively prevent broken bottles from filling.

Features:

1. It can be adjusted from whole plug to semi plug.
2. With PLC control, operators only need to input related appropriate data.
3. High precision, strong adaptability and high automation degree.
4. With many detachable components, this filling and plugging machine is quite easy to maintain.

Main Parameters:

Bottle Size	2~25ml glass or plastic bottle
Production Capacity	4800~7200bottle/hour
Volume	0. 5-25ml
Package Accuracy	0-2%
Rate of Sealing	≥99%
Electric Supply	380V/50hz, 3phase
Size	1700×1300×1800mm
