

# HONGREAT®

## *Blood Collection Tube Labeling Machine*

This blood collection tube labeling machine is used for 13\*75mm, 13\*100mm, 16\*100mm blood collection tube high speed labeling process. It applies PLC control for tube dropping, step-motor for label transporting, photoelectric detection for labeling and tube checking. This Blood Collection Tube Labeling Machine can be your most practical and economical choice without compromising on its performance and quality.

Blood Collection Tube Labeling Machine has the processing capacity of 30000pcs/h, and its tube size is available with three types. Also, it achieves perfect automation with only several workers needed to be on duty. We can provide you the installation and personnel training of this machine, so you don't have to worry it will lack after-sales service and guarantee.

### **Product Parameters:**

- Production capacity: 30,000 pcs/h
- Tube size: Ø13\*75mm; Ø13\*100mm; Ø16\*100mm
- Tube volume: 1ml-10ml
- Power: 1.5W/AC220V
- Overall dimension: 2400×700×1600mm (L×W×H)
