

## Automatic Liquid Filling Machine AT-L

The machine has a simple structure, which can widely used for liquid filling such as juice, soy sauce, vinegar, edible oil, oral liquid, disinfectant, pesticide, chemical, and other liquids filling. The filling is accurate, no bubbles, no dripping. Applicable to a variety shaped bottles filling.

### Features

1. This machine adopts PLC control, LCD touch screen operation interface.
2. The international brand pneumatic filling valve to ensure no dripping during the filling process.
3. Adopts constant pressure fixed flow channel parameters, and controls the filling time to realize different volume filling.

### Technical Data

Model	AT-L4	AT-L6	AT-L8	AT-L12
Filling range	40-1000ml			
Capacity(500ml)	900bottles/hour	1500bottles/hour	2400bottles/hour	3600bottles/hour
Filling accuracy	±1%(>100ml)			
Air pressure	0.5-0.7mpa			
Air consumption	200L/t	200L/t	200L/t	400L/t
Power	1.0KW	1.0KW	1.0KW	1.5KW
Weight	260kg	260kg	260kg	400kg
Dimensions(mm)	4000*800*2100	4000*800*2100	4000*800*2100	6000*830*2200
