

GRT-52A Inclined Intermittent Automatic Packaging Machine

Product features:

1. The series models is a set of bag, filling, sealing, printing, punching, count machine;
2. Using servo motor double synchronous belt tension membrane, and with automatic correction function;
3. PLC control components are adopted international famous brand products, reliable performance, transverse sealing, vertical sealing to pneumatic, steady and reliable action;
4. The machine and metering device can automatically complete the whole process of supporting packaging metering, feeding, filling, date printing;
5. Advanced design ensures the packaging machine and makes it's suitable for different industries, it is very convenient when in using, adjustment, operation, repair;
6. It is support to use of the domestic and foreign various measuring equipment.

The bag form:

This machine can be made according to customer needs pillow shaped bags, bag.

Specifications parameters:

Project	Content
Packing speed	45 packages /min
Bag size	(L) 20-450mm (W) 140-300mm
Measurement range	≤4 liters
Film width (max)	730mm
Film thickness	0.06-0.12mm
Pascal gas consumption	0.7x10 ⁵ Zhao Pascal 200 L / min
Power/ Voltage	4.5KW/220volts 50HZ
Dimensions	L1360*W1630*H1900mm
Weight	900kg
