

## *Vertical Form Fill Seal Packaging Machine TH-PM-P-50*

The vertical form fill seal packaging machine can complete measuring, filling and other work. Due to the original design, it is more suitable for packaging powdery and granular materials with easy flow or poor fluidity, such as veterinary drugs, powdered particle additives, sugar, glucose, monosodium glutamate, solid drinks, solid drugs, toner, talcum powder, pesticides, dyes, spices and so on. This vertical form fill seal packaging machine has specific packing range, which is more suitable for packing large bags of powder between 10kg and 50kg, such as rice, flour, cement powder and so on.

### **Product description**

The main parts of vertical form fill seal packaging machine:

- ♥Automatic filling system
- ♥Automatic weighing filling balance
- ♥Automatic belt conveyor
- ♥Automatic sewing / sealing machine
- ♥Electric control cabinet

### **Features**

1. Vertical form fill seal packaging machine adopting high precision sensor and intelligent meters.
2. Error automatically amended, trouble self-inspected, packaging speed display.
3. Adopting famous brand process switch and air equipment, Performance Stable, and easy to maintenance.
4. Optional machines: sealing machine, coding machine, sewing machine, belt machine.
5. This sachet plastic bag filling sealing packing machine powder is equipped with the photoelectric tracing system of high precision.
6. English and Chinese screen display, operation is simple.

**Parameter:**

<b>Model</b>	<b>TH-PM-P-50</b>
Filling range	10-50kg(adjustable)
Feeding method	screw auger
Filling capacity	25kg*(7-10)bags/min
Power supply	1.8Kw, AC380V, 3phase power, 50/60Hz
Pneumatic power supply	0.4-0.6MPa
Whole machine weight	460Kg
Machine dimension	240cm*160cm*280cm
Bags material applied	Woven bag, craft paper bags for sewing sealing;
	PP, PET, Compound film bag ect for heat sealing
Certification	CE
