

## NTFZ Series Lifting Column

This machine is mainly used in the pharmaceutical industry to sort out the uniform and qualified particles after granulation. At the same time in the pharmaceutical, chemical, food and other industries widely used.

### The characteristics:

The machine has reasonable structure, stable performance, easy operation and no exposed screw. The machine is equipped with a mis-operating device, discharging butterfly valve, easy to disassemble, easy to clean, to ensure production safety. The whole granule machine can rise and fall to any process height with the cone bucket, which is convenient for sealing docking with the next process equipment, effectively controlling dust and cross pollution, optimizing the production process, and fully meeting the GMP requirements of drug production.

### Technical Parameter:

型号 Model	主要结构尺寸 Main structural dimensions										机器重量 Weight T	整粒参数 Granule sizing parameters		提升参数 Lifting parameters	
	A	B	C	DN	Φ	L	H	H1	H2	H3		kg/h	kw	kg	kw
