

Flat Labeling Machine KLYP-100A

Flat labeling Machine Fully mechanical transmission is adopted, and the moving parts are all rotated by a closed immersion tank, which is light and handy, with less failure and low noise.

- ◆Flat labeling Machine The motor load is low, the panel and the turntable are made of stainless steel, which is not rusty, durable, clean and easy to maintain
- ◆Flat labeling Machine Can be operated alone or designed as a connected production line
- ◆Flat labeling Machine Small floor space, can be moved arbitrarily, adjust the working space
- ◆Flat labeling Machine Suitable for labeling round containers in the chemical, pharmaceutical, food and beverage industries
- ◆Flat labeling Machine Printing device can be added to the product according to user needs

Technical Parameters

Model	KLYP-100A
Labeling Speed (pcs/min)	0-50 (depend on bottle and label size)
Roller Diameter	76 mm
Roller Outside Diameter	300 mm(max)
Label Size	W:10-120mm, L:15-250mm
Material Size	Diameter: 20-100mm ; H: 20-200mm
Voltage	AC220V 50/60HZ
Power	1 KW
Dimension	2000*1050*1250mm
Weight	170 KG
