

## *Pharmaceutical Swing Oscillating Granulator YK-100*

Main application This Granulator Machine is suitable for granulating in pharmaceutical, food, chemical, solid beverage and other industries. The Granulation Machine can make the stirred material into the required size of particles, or the lump material into small particles. Swing granule machine is used to develop the wet powder into the required particles, but also can crush the block of dry material to the required particles.

### **Technical Parameters:**

- Model No.: YK-100
- Output (kg/h): 30-200
- Dimension(L\*W\*H): 700\*600\*1050mm
- Weight (KG): 280
