

Honey Packing Machine DXDB-J80C

Characteristics:

1. The fully automatic honey packing machine comes with PLC programmable control and an English and Chinese display screen, making it easy to operate and maintain. It is easy to adjust.
2. A photoelectric tracking system and two-way compensation function of the honey packing machine ensure correct and accurate double-face printing and counting.
3. The honey packer shell, made of full stainless steel, is highly corrosion proof, easy to clean, and meets GMP requirements.
4. The packing machine uses a piston pump for measuring in material feeding.
5. For cutting, flat cutting, fracture line cutting or saw-tooth cutting can be chosen. A ribbon coding machine is optional.

Usage:

The packing machine is used for packing catsup and thick paste materials such as peanut oil, salad oil, tomato paste, cough syrup, shampoo, cream oil, vaseline and so on, providing measuring and automatic packing into sachets. It is used in the medicine, food, and daily chemical industries, etc.

Main Technological Parameters:

Item / Model	DXDB-J80C
Pouch length	50-120mm (adjustable)
Pouch width	20-80mm
packing speed	30-60 times/min
Filling capacity	2-50ml /bag
Cutting	Flat cutting, with tear notch
Applicable film	PET/AL/PE, PET/PE, NY/AL/PE, NY/PE/aluminize/complex film
Electric source	380V 50Hz (as per customer's request)
Total power	1KW
G.W.	260 Kg
Package size	1,100*800*1,600mm(L×W×H)
