

WT-630GS Multifunctional Round Bottle Labeling Machine

Pharmaceutical and other industries round bottle labeling.

The machine uses pneumatic roller original structure. High labeling accuracy.

Especially suitable for the whole week great circle bottle labeling, high repeatability, no bubbles, specialized in the design, no sub-bottle body, making the system simpler, more efficient,

As a result of high-power servo motor, increasing the scope of the label, completely solve the pervasive problem of inadequate labeling machine torque.

Star wheel disc structure segmentation, high speed labeling accuracy.

Affinity advanced man-machine interface systems, online help, real human-computer interaction, easy to learn. Workers with minimal training to operate.

Technical parameters

Type	WT-630GS
Labeling speed	45 m / min
Labeling accuracy	± 1mm
Maximum label width	190mm (can be designed according to customer requirements)
Be affixed size	Φ30-Φ100mm
Roll inter	Φ76.2 mm
Applicable roll diameter	Maximum Φ330mm
Machine size	L2000 * W700 * H1400 (mm)
Using gas source	4-6KG 30L/min
Use Power	220V 50HZ 1200W
