

Automatic Twist Cap Capping Machine PC-200

This automatic capping machine is suitable for round cap, spray/pump tightening, can work with existing filling line.

Electrical control movement, strong stability;

With positioning devices, standard Capping, easy to operate;

Wide capping range suitable for different shapes and sizes; resolved the difficult problem on nozzle cap, pump cap, spray pumps, spray gun in hand button Capping;

Lock lid with adjustable speed can be adjusted according to different cap tightness.

Widely used in detergent shampoo, shower gel, hand cleaning gel, laundry detergent and many other daily chemical products.

Characteristic:

1. PLC controlled, touch screen operation, integrated cap capping (automatic cap sorting/cap feeding can be option)
2. Automatic infeed cap and bottle position-setting and orientation, adjustable torque control.
3. Gentle manipulation, no scratch and injury to caps and containers
4. Easy changeovers, no need to change the fitting, just simple adjust, easy to operate. One line capable of several bottle and caps.
5. Connected with filling machine and labeling machine easily
6. Module structure, manipulate on the touch screen, easy maintenance

Specification:

Model	PC-200
Application	Pump cap ,needle cap & standard cap capping
Production	1000-2000B/Hour
Power	220V 50Hz 0.7KW
Cap height	10-30mm
Cap diameter	Φ 19--Φ 55mm(can be customized)
Bottle height	80-350mm
Bottle diameter	Φ35-Φ100mm (can be customized)
Air supply	0.4-0.6Mpa
Weight	300Kg
Dimension	2000*1100*1550mm
