

LT-500U Mixing Sauce Filling Machine

The LT-500U mixing sauce filling machine material valve control system adopts the unique patented technology. It could do the filling of solid material containing chunk, semi-liquids and dope, and the sauce of oil, water, material in separation condition. The liquid contractive parts are made of stainless steel, meeting GMP requirement.

Product Detail

- 1.This LT-500U mixing sauce filling machine for sauce can finish the fixing and filling work automatically.
- 2.The parts contacting with materials of the mixing and filling machine all adopt the stainless steel material, which meet the international health standard. The filling quantity can be arbitrarily adjusted within the prescribed scope.
- 3.This sauce mixing and filling machine uses electric device as its power, which is easy to operate.
- 4.The material valve control system adopts the unique patented technology. It could do the filling of solid material containing chunk, semi-liquids and dope, and the sauce of oil, water, material in separation condition.

Technical parameters

Model name	LT-500U mixing sauce filling machine
Voltage	AC 220V 50Hz
Power	120w
Filling speed	8-25 times/min
Air pressure	0.4-0.6Mpa 10m ³ /h
Filling accuracy	≤1%
Total weight	100kg
