

Ampoule Tunnel Sterilization Dryer

Our ampoule tunnel sterilization dryer is mainly used on the injection linked production line of pharmaceutical factories. It is suitable for continuous drying, sterilizing and pyrogen removing of the washed ampoule or big/small glass medicine bottle.

Features:

- Using heating of “hot air laminar flow”, it achieves constant and even heating
- Short sterilization time, good sterilization effect
- High production capacity

Main technical parameter:

Model number	SZAL400/32	ASMR600/43
Production capability	7000-20000 bottle/hour	11000-30000 bottle/hour
Tunnel air cleaning level	100 class (USA standard 209E)	
Power	Machine power: 36.59kw Elec. Heating power:32.4kw	Machine power: 47.39 Elec. Heating power: 43.2kw
Power supply	380V 50Hz(3-phase 5-line)	
Noise of whole machine	Less than 80dB(A)	
Max. working temperature	350°C	
Bottle outlet temperature	Lower than room temperature+15°C	
Overall size (mm)	3150×1400×2350	3150×1550×2350
Weight	1900kg	2000kg
