

## *High Speed Automatic Hand Sanitizer Production Line SG1803-2*

### **Machine Features:**

1. High speed of model switching, satisfying the customers who have many products and frequently change product models;
2. Quick clamp connection of cylinder, easy to clean;
3. Wide range of bottle types, even irregular-shape bottles, requiring no special adjustment;
4. Rapid filling speed, adopting servo filling-high filling accuracy, 0.5% filling deviation, independent control to both cylinders, independent adjustment to the capacity;
5. Double screw cap, reducing the capping time, ensure the tightness of each cap- positioning function of the pump head and adjustable torque of the screw cap

### **Materials And Accessories:**

- 304 stainless steel for good looking;
- 316 stainless steel for liquid-touching cylinder;
- Taiwan AirTAC for all pneumatic components;
- Omron programmable controller-PLC;
- Delta servo controller;
- Schneider switching device, etc.

### **Application:**

- Cosmetics,
- Food, sour milk, cream, cooking oil, etc.
- Industrial oil / paste, e.g. shampoo, hair conditioner, laundry detergent, shower gel,

**Applicable Bottle Type:**

- Round bottles,
- Square bottles,
- Irregular-shape bottles,
- Plum vases,
- Plastic bottles,
- Glass bottles,
- Porcelain bottles, etc.;
- All the bottles that can stand on the conveyor line are usable.

**Technical Parameters:**

<b>Model</b>	<b>SG 1803-2</b>
Working Voltage And Power	220V AC 50Hz 2KW
Length, Width And Height	418.5*90*183 cm
Weight	600 KG
Filling Speed	40-60 Bottles/Minute
Filling Capacit	0/ 500-5000 ml
Material	304/316 Stainless Steel
