

Semi Automatic Filling & Sealing machine PLF-5S

Performance: Semi Automatic Filling & Sealing machine

Output: 15 cups a min

Product: Powder / Granulated / Pieces / Paste / Liquid

A semi automatic machine for filling and sealing cups with aluminum foil lids. The PLF-5S offers forming and cutting membranes from a roll instead of pre-cut aluminum foil lids. The machine easily handles a variety of products up to a volume of 20 oz. Most operations are performed pneumatically.

Features:

- Exceptional versatility enables the machine to fill a broad range of liquid and paste products.
- The machine can be easily adapted to handle a variety of cup sizes and configurations
- All product contact parts are stainless steel. The machine is manufactured using stainless steel, anodized aluminum and plastic, all of which conform to CE, FDA and 3A standards for food grade materials.
- Economically priced for a high quality finished product.
- Fast and easy operation that can be performed by one operator
- PLC Waterproof Control System

Options

- Two filling operations can be performed in the same cup before sealing (e.g. yogurt topped with granola or pudding topped with whipped cream).
- Code printing.
- Discharge conveyor.
- Gas Flush System
- Impulse Automatic Sealer for Bags

Automatic Operations Include

- Dispensing of cups into the pocket
- Filling of the cup
- Pre-cut aluminum foil lid placement on the cup
- Heat sealing
- Code printing on lid (optional)
- Ejection of cups
