

YBZB-40P Full Automatic Glass Jar Vacuum Capping Machine

This machine is used for capping glass jar which contained condiments, beverage and so on. After equipped with vacuum system, the machine pumps air to make the glass jar into vacuum state, and then seal with screw cap. It could prolong the shelf life and improve the mouth feel. It is automatic jar-in, automatic cover down, no-jar-no-cover and vacuum function.

It is a fully automatic vacuum and capping machine for round and abnormal shape glass jar. It is ideal machine for food plants.

主要技术参数

生产能力	40瓶/分 b/min
适用瓶盖	38~82mm
适用瓶高	30~180mm
拧紧力距	3~10N.m
破碎率	< 1‰
重量	650kg
电机功率	2kw
外形尺寸	3250 × 660 × 1500mm
