

CFR-II Fully Automatics Plastic Bottle Filling and Sealing Machine

This New model is base on our company year's manufacture experiences, clients need & enquiry; in addition with our own innovate technology to develop this machine.

To compare with traditional machine, the new model advantages are:

- This machine has automatic dropping and hanging soft-bottle function, to reduce the cost of labour and increase production efficiency.
- This machine has automatic counting function; the quantity of production could be easier to control by touch screen, and also convenient for the production management.
- The tube of filling valve has recycle device, which can prevents waste source and source overflow when container full.
- The filling valve will not process injection wife the sensor did not detect bottle, this function can coordinate company to control production cost.
- Sealing by mechanic instead of pneumatic component.
- This machine cans filling and vacuuming at the same, which function can prevent product to result bubble and extend expiry date.
- This machine has integrated the strength of traditional machine, which can automatic heat sealing and automatic push out to next step.
- The whole machine is control by PLC and operates by touch screen

MAIN MOTOR POWER 主电机功率	VACUUM POWER 真空机功率	VACUUM GEAR-PUMP POWER 真空齿轮泵	SEALING-HEAT POWER 封口加热功率	WATER CONSUMPTION 耗水量	SOFT-BOTTLE DIMENSION 适应瓶形	FILLING VOLUME 充填量	CAPACITY 产量	WEIGHT 重量
1.1KW	2.2KW		10KW	0.5t/hr	Φ18 ~ Φ25 L:160 ~ 300mm	60~150mm	7000~8500pcs/hr.	2T

PS: The dropping and hanging, special roller chain & auto filling system has protecting by patent.

注：本机自动挂瓶、专用挂链、自动充填等系统受专利保护。
