

Vertical Bag Packaging Machine

The vertical bag packaging machine with a wide range in food, pharmaceuticals, commodity and ect.

Functions:

- Multi language touches screen display, simple and visual operation.
- PLC control system, ensure the stable operation and the parameter can be set with non-stop machine. servo
- The weighing system can store 10 group parameter setting, easy for changing to another products and fast operation.
- Servo motor controls the film pulling, the location will be more accurate.
- Independent temperature control module system, the accuracy can be controlled within 1 degree centigrade.
- The horizontal or vertical sealing temperature is independently controlled, suitable for different kind of complex film and PE film.
- The finish bag can be central sealing, continuous bag, hole punching and ect.

Main Technical Parameter:

Packing speed:	10-40 bags/min
Bag-making size:	(L)80-300mm(W)80-200mm
Filling range:	10 to 1000g
Packing materials:	OPP/ CPP PET/PE etc. compound film
Film thickness:	0.04-0.08mm
Air consumption:	0.8m ³ /min
Power supply:	AC220V 50Hz 3.5kw
