

Liquid Food Product Packaging Machine HTL-C388

It is applicable to automation packing for loose and small articles of powders like stock for candy, soup, drying agent, powder, sugar, sesame paste, soybean powder and small expanded food.

Characteristics

- Use computer control and drive engine control the length of bag and the position of trade mark.
- All the works of bag-making, measuring, filling, sealing, cutting and codes printing can be done automatically.
- Three-side sealed, it is suitable for the small granules of substance such as sugar material, drying agent, coffee and oatmeal, etc.
- Use computer control, the length is set by computer, needless of exchange of gear or the adjustment of the bag length.
- Photoelectric eye pursuit, orientation nicety, easy adjustment.
- HTL-388 series products aimed to all substance and can be adopted three-side, four-side and pillow sealed shape.

Specifications:

Machine model	HTL-B388 Automatic Granule Vertical Packing Machine
Packing speed (bag/minute)	30-90
Measurement range (ml)	5-500
Bag making size (mm)	(Length): 50 -200
	(Width):50-120
Weight (kg)	380
Power source voltage (v)	220
Packing material	Composite material as OPP/CPP, OPP/CE MST/PE PET/PE
Dimension (L*W*H)mm	650*900*1740
