

## *CGF-series PET Plastic Bottle Mineral Water Filling Machine*

Bottled Drinking Water Filling Machine, Its Filling Method Is Gravity Filling. Gravity Filling Machine, Also Known As Atmospheric/Normal Pressure Filling Machine, Means That Under Atmospheric Pressure, It Directly Relies On The Weight Of The Filling Material To Flow Into The Packaging Container. This Kind Of Filling Is Only Suitable For Filling Liquid With Low Viscosity And No Gas.

PET Bottle Water, Low Cost, Easy To Carry, And Diversified Bottle Design. It Is The Main Way Of Drinking Water Packing In The Market.

### **Technical Parameters:**

<b>Filling Product</b>	Water
<b>Filling Speed</b>	Max 30000bph
<b>Bottle Size</b>	Φ55-110MM, Height 150-310mm
<b>Control Type</b>	PLC
