

Irregular Shaped Sachet Liquid Bag Packing Machine DCJYJ-300

This machine is installed with piston pump or needle pump which is suitable to pack liquid or paste products, such as cream, oil, water, sauce, shampoo, fruit juice into irregular bag type. We design the machine die mold according to customers' different requirements.

Main Features

1. With the function auto filling, measuring, bag forming, code printing, sealing and cutting. Bag-making system adopts step motor with high precision
2. Touch screen display.
3. Controller adopts Chinese or English displaying, can see the working conditions directly.
4. With intelligent photoelectric controller system.
5. Machine body full of 304 stainless steel.
6. Liquid filler, high accuracy.
7. Good visibility with side-open protective platens, operate safely.
8. Adopt the newest hopper sets, easy to adjust and clean, no need adjust again after clean, so that can improve working efficiency
9. This machine is suitable for the packing of granule products, bag can choose from 3-side or 4-side seal or back seal according to customer needs.
10. Ribbon printer is addable according to customer needs, which can print one to three lines letter, date of produce and batch number.

Technical specification:

Model	DCJYJ-300
Sealing type	4-side sealing
Measurement	Needle valve pump for liquid products (without hopper 0-30ml, 30-100ml)
Cutting type	Straight cutter with V tear notch
Sealer	Horizontal sealer: line Vertical sealer: diamond
Capacity	30 - 45bag/min (Depend on Products)
Bag size	Bag length:30-190mm Bag width: 10-100mm
Total power	2600kw
Air Consumption	0.35m ³ /min
Voltage	220V or 380v or made accordingly
Weight	420Kg
Machine size	L×W×H : (900x730x2200)mm
Material	Touch parts:Stainless steel 304
Includes	photo sensor
	Date coding ribbon printer
	one bag former
	One Needle valve Pump
	One die mold
