

RCGF72-72-18 Juice Bottling Machine

The juice bottling machine for sale is suitable for filling fruit juice beverage and fruit tea beverage in high temperature resistant polyester bottle, as well as non air beverage such as mineral water and purified water.

The whole complete juice bottling machine line includes water treatment, beverage processing system, juice bottling machine, labeling machine and packing machine.

FEATURES

- ✓ Bottle is entered into juice bottling machine for sale by air conveyor, the speed of bottle entering is fast and bottle shape is not changed because of adopting hanging clamping bottleneck way.
- ✓ Adopting clamping bottleneck way in juice bottling machine for sale to wash bottle mouth and avoiding touch screw mouth, adopting clamping bottleneck way in the whole conveying process. When bottle type changes, you need to changeover the board related with bottle diameter.
- ✓ Filling adopts cylinder feeding structure, filling valve of juice bottling machine adopts high filling speed and mass flow rate valve which control liquids level accurately and without loss.
- ✓ The capping system of juice filling machine for sale applies advanced French technology, when clamp the cap will screw immediately and magnetic torque type capping head.
- ✓ Main PLC and frequency changer in juice bottling equipment are used famous brand, such as Mitsubishi and Omron etc.

TECHNICAL PARAMETERS

Model	RCGF72-72-18
Rinsing heads	72
Filing heads	72
Capping heads	18
Capacity	28000
(b/h)	
Power	15
(KW)	
Dimension(mm)	6800*5800*2850
Weight	15000
(kg)
