

FJZ-Z linear type powder filling machine

Purpose and brief

This machine is a bigger bottle of powder filling device, used for a variety of vials, infusion bottles or other bottles of powder filling, tamponade or screwing capping lock. Using PLC control, touch screen setting, convenient adjustment, high precision measurement by screw control, accurate measurement, high degree of automation.

Main technique parameters

Production capacity: 50 ~ 80 bottles per minute

Suitable bottle: penicillin bottle

Weight: 3G ~ 100g

Load precision: 1 ~ 3%

Letter of export rate: 99%

Power source: 380V 50Hz three-phase four wire system

Power rate: 2Kw

Dimensions: 2300x650x1800
