

XS-F2 Automatic Quantify powder packing machine (small type)

Agrochemical, monster medicine, prepare to mix a metered packing of anticipate the additive, wheat flour, milk powder, starch, compound condiment(such as spicy fresh),natural condiment(such as 13 joss-stick),substrate product, etc. powder form(tiny powder, super and tiny powder),the grain form filling material.

The function and characteristics:

- 1) This machine gather electricity, light ,instrument in integral whole, single slice machine control, have an auto fixed amount, automatic filling and adjust to calculate an error margin automatically etc. function.
- 2) Quickly speed: Adopt the helix descends to anticipate, the light control a technique.
- 3) High precision: Adoption treads to weigh a technique into the electrical engineering and the electronics.
- 4) Wide scope of packing specification :Same pedestal machine calls the keyboard adjust and replaces different specification to descend to anticipate through an electronics in 1 – 50g spiral the consecution is adjustable.
- 5) Apply scope wide: sing a certain and mobility powder form, the grain form thing all can; the packing container(bag, bottle) is unlimited.
- 6) Because of the material specific weight with anticipate the error margin that a variety result in and can be automatically carry on following correction.
- 7) Light electricity switch control, need the artificial set bag only, the bag thirsty is clean, easy to sealing.
- 8) Contact the material part to rest to use the stainless steel creation, clean convenience, prevent from crossing a pollution.
- 9) Can go together with an auto provide to anticipate device, more convenient customer use.

Technical Parameters:

Model	XS-F2
Packing specifications	1-50g
Packing speed	1500/2500perhour
Packing precision	0.2-0.5g
Power Voltage	AC380V 50HZ 600w
The machine weight	90kg
The machine size	L600*W400*H860(mm)
