

Beverages Filling Machine

Multipack introduces filling machine to fill beverages and others. The machine comes with 2, 4, 6, 8 heads. Volumetric filling is the principle based on which beverages filling machine works. The machine consists of a syringe, a conveyor, a volume adjustment block, filling nozzles and no bottle no filling arrangement.

Features

- All exposed parts are of S.S. 304, matt finished avoiding any reflection for achieving the most concentration and efficiency of the operator.
- Co-Eccentric nozzles allows very quick and precise setting and making unit compact and manageable.
- Crafted S.S. holders, lapped glass as well as S.S. syringes and piston and precision built valve system for achieving very high accuracy in fill size and drip proof performance. Precise setting and accuracy can be easily adjusted on the machine itself.
- No bottle – No stoppers – No filling system.
- Easy to use control panel for operation
- Minimum change over time, from one size of container or fill size to another.
- Machine height can be adjusted to match with other machines so as to synchronize with each other efficiently.
- Suitable for oil companies / industries.

Specification

| HEADS | 4 HEADS, 6 HEADS, 8 HEADS |
|-----------------------|---|
| Output Per Hour | 8000 – 25000 Bottles pr day.(Depending on the nature of liquid and its fill size or volume) |
| Power Characteristics | 440 V 3 Phase 50 Hz 4 Wire System With Ac Frequency Drive |
| Fill Size | 2 ml TO 5000 ml (With Help Of Extra Change Parts) |
| Filling Accuracy | +0.5% |
| Net weight | 600 Kgs. Max.(Without conveyor) 675 Kgs. Max.(With Conveyor) |
| Dimension | Length (L) 1800 mm Width (W) 900 mm Height (H) 1500 mm |
