

## *KENO-L107 Non Dry Glue Labeling Machinery*

Using from top to downward method, we can paste the label on the flat object. Electric eye inspection and synchronization meter tracing guarantee the speed of label supplying and feeding rate precise. While the speed may adjust at will. After refitting the part, it can stick label on the seal and the corner, even the concave.

### **Technical Parameters**

- Object to apply: Flat object
- Dimensions (L x W x H): 1200 x 600 x 1500mm
- Label length: 15 - 300mm
- Label height: 15 - 130mm
- Object width: 15 - 150mm
- Object thickness: 20 - 130mm
- Power supply: 220V, 50/60Hz, 0.24kW
- Weight: 125kg
- Label speed: 0-120 pcs/min
