

Semi Automatic Sleeve Sealing Machine and Shrinking Machine BSF-6540XLT

The product can be fed manually or pneumatically. When the sealing & cutting cycle is complete, the product is discharged into the shrink tunnel automatically. The machine is used to shrink package single and multiple products.

Application:

- Ideal solution for many industries, such as printing, pharmacy, floor, chinaware, beverage, beer, etc.
- It's suitable for PE film.

Parameters:

Model	BSF-6540XLT
Voltage(V/Hz)	AC 380/50 220/60 3 Phase
Compressed Air (Lt/min)	60
Power (kw)	18.5
Max Packing Size(L×W×H)(mm)	520× 320×350
Maximum film width(mm)	600
Packing Speed (pcs/min)	8-10
Sealing & Cutting Length (mm)	650
Sealing time setting(S)	1.5-3
Temperature Setting (°C)	150-250
Suitable film thickness(μm)	PE 40-80
Tunnel Size (L×W×H)(mm)	1500×600×400
External Dimension (L×W×H)(mm)	3500×860×2000
Net Weight (kg)	520
