

WP-18 Small Tea Bag Packing Machine

Small tea bag packing machine is a device used for one-time packaging of small granular materials such as tea leaves in inner and outer bags.

Products Description

1. The small tea bag packing machine integrates the functions of automatic filling, bag making, threading, labeling, outer bag heat sealing, automatic counting, etc. It is suitable for packaging small particles such as tea, medicinal tea, health tea, grass roots, etc.
2. The flat cutting technology is adopted, the sealing is smooth, beautiful and not easy to leak, which ensures the product's functions of moisture-proof, odor-proof and freshness-preserving.
3. It adopts advanced PLC plus touch screen electrical control system, with friendly human-machine interface and easy operation.

Products Parameters

Model	WP-18(Inner bag)
Capacity	40-55 pcs/min
Size	(L)50-100(W)40-80
Dosage	0.5-3g
Power	3500W
Weight	350kg
Dimension(L*W*H)	950*750*1780(mm)(LxWxH)
