

## *SJ-2000 Semi-Liquid Packing Machine*

### **Features**

Bag length, filling volume, packing speed, and more can be set on touch screen, easy to operate servo driven system, ensuring of accurate bag length and filling dose.

Automatic in forming, measuring, filling, sealing, cutting, counting, lot code printing.

### **Film materials**

Polyester/polyethylene, polyester/foil/polyethylene, polyester/aluminium/polyethylene

Paper/polyethylene, Nylon and other heat sealable laminated film structures.

film material requirement: thickness between 40 micron and 80 micron, roll core no more than 75mm, roll diameter no more than 320mm

### **Applications**

Applicable in food, medical, chemical industries, for water thin liquid, such as milk, sauce, vinegar wine, mineral water and more.

## Technical Parameters

<b>Model</b>	<b>SJ-2000</b>
bag length	50-250 mm
bag width	40-175 mm
film width	100-380 mm
bag volume	200-1000 ml
packing speed	19-22bpm
power supply	220V/AC 50Hz 2.5Kw
machine dimension	1050 x 850 x 2050mm
machine weight	380Kg
sealing style	pillow style
