

## *Automatic Food Packaging Machine ATS-700*

The consumer market demand for microwave frozen food, single serving frozen meals, ready to eat food products, and takeout foods are on the rise. Consumers are not only concerned about food safety and the quality of these products, but they also desire the convenience of these types of foods. ANKO's ATS-700 Automatic Top Sealer is designed for central kitchens as well as other food manufacturers. It's easy to use and suitable for packaging a wide range of products such as Dumplings, Potstickers, Siomai and Xiao long bao, all of which need to be stored and shipped in different sized and shaped cartons. Once the products are loaded onto the automatic sealer by an operator, it then has the option of having the cartons sealed automatically or manually. There are customizable print settings, and the packaging film rolls are easy to be changed and replaced.

### **Features:**

- [Master] System Control Switch. Sealed products can be removed with ease. Molds and Films can be changed effortlessly.
- Ample space for interchangeable sets of molds and containers.
- Sealer could be fine-tuned for precision, and heat-resistant materials are used.
- Temperature monitoring system equipped with malfunction warning lights.
- Independent automatic and manual switches are available.
- Machine is made with aluminum alloy and stainless-steel, featuring an anodic treated aluminum alloy rotating disc with corrosion resistance.

**Technical Parameters:**
