

GPA-50 Automatic Carton Case Sealing Machine

Two sides belt driven carton sealer is driven by the belts on the both side, with BOPP tape seal, box can be sealed smoothly. The size can be adjusted manually according to the box's size which is easy and convenient to replace labours, increasing work efficiency up to 30% and saving 5%-10% consumables. This machine is an ideal option for light high boxes, it can save costs and increase producing efficiency. It can be widely used in food, medicine, toys, tobacco, daily chemicals, electronic tobaccos and other domestic industries.

The automatic sealing machine has a wide range of USES, suitable for household electrical appliances, textile, food, daily provisions, medicine, light industry, chemical industry and so on various products packaging, carton sealing, sealing homework alone, or with filling, bales into the flow assembly line is used, as necessary for packing assembly line equipment, sealing machine adopts the stick tape sealing the carton sealing, rapid economic, easy to adjust, can be a complete upper and lower sealing action, using printing tape, but also could enhance the image of the product.

Specification

Max carton dimension	L(unlimited)*W500*H500MM
Min carton dimension	L200*W150*H120MM
Power supply	220V 50Hz, 240W
Speed	0-20 M/Min
Tape width	48MM 60MM 75MM
Weight	120KG
Outline dimensions (LxWxH)	L1020*W850*H1350MM
